SUMMARY

I am a proactive Computer Science student with a strong foundation in software development and hands-on experience in front-end development. During my internship at SRS Infosystems, I honed my skills in crafting user-centric interfaces and optimizing user experiences. My expertise lies in Web and Android development, and I have successfully contributed to projects such as the Connect for Change App as a Team Lead, A Android Applcation personal project, and a Client Website during internship. I am passionate about creating visually appealing, responsive, and accessible designs that enhance usability and engagement.

EDUCATION

Bachelor of Technology in Computer Engineering   Jan 2021 – July 2024
St. Vincent Pallotti College of Engineering & Technology • Nagpur, Maharashtra   GPA 8.3

EXPERIENCE

Software Development Intern   15 Dec 2023 – 15 April 2024
SRS Infosystems Pvt. Ltd.
- Developed and deployed a client website using HTML, CSS, JavaScript, and PHP, creating a responsive and user-friendly interface while optimizing performance and usability.
- Built the front-end for a Quotation System add-on for Google Sheets, designing a gallery module for template selection and integrating cloud storage to streamline data management and improve user experience.
- Designed the UI/UX for an in-house geofence and WiFi-based attendance monitoring system using Figma, focusing on intuitive navigation and seamless functionality.

PROJECTS

Web Development Project   Parshwa
Acrylic's Acryprint Website
- Developed a website allowing users to upload images, preview them in different shapes and sizes, and order them from the website.
- Customized the project according to client requirements.
- Utilized Google Sheets to store information of orders and their details.
- **https://www.acryprints.com/**

App Development Project Shopquick
Application
- Developed an e-commerce application replicating Amazon's interface using Java as the primary language and XML for designing the front end.
- Implemented user authentication, data storage, and real-time database functionality with Firebase, ensuring seamless user experience and secure data handling.
- Designed a visually appealing and responsive UI to deliver a professional and intuitive shopping experience.
